

How is my water/sewer bill calculated?

Your bill is mailed quarterly. The minimum usage for water/sewer is 6000 gallons per quarter. The water rate is .008 cents per gallon and the sewer rate is .007 cents per gallon.

The minimum bill is calculated as follows:

Water = 6000 x .008 cents per gallon = \$48.00

Sewer = 6000 x .007 cents per gallon = \$42.00

Storm Sewer surcharge per quarter = \$6.00

\$96.00 per quarter (\$32.00 per month)

Each additional 1000 gallons per quarter is an additional \$15.00.
